Ampara, Sri Lanka github.com/FaiqueMZM

SUMMARY

Software Engineer with 1+ years of professional experience across the full development lifecycle — database design, RESTful and real-time API development, and responsive front-end and mobile UIs. Comfortable in TypeScript-first environments (React, Node.js, Flutter) with modern tooling (Turborepo, Vite, Docker). Strong foundation in relational databases (PostgreSQL, Prisma), authentication/security, and cloud storage (AWS S3). Adapts quickly across the stack, writes clean and maintainable code, and thrives in cross-functional Agile teams.

EDUCATION

2020 - 2023
United Kingdom

BEng(Hons) in Software Engineering
University of Staffordshire

- **Bachelor of Engineering with Honours Software Engineering, Second Class: 1st Division** from Staffordshire University UK through APIIT Sri Lanka.

EXPERIENCE

07/2025 - Present
Mumbai, India

Full Stack Developer
Syntax Erreur
syntaxerreur.com

Transforming Bold Ideas into Unstoppable Products That Dominate the Market

- Build and maintain RESTful APIs (Node.js/Express, PostgreSQL via Prisma) achieving 99% uptime, with robust error handling, rate limiting, and background job processing via BullMQ.
- Develop across web (React) and mobile (Flutter) clients within a shared TypeScript-first Turborepo monorepo.
- Implement real-time features using Socket.io on both backend and client sides.
- Improved front-end load times by 15% through query caching, Redux state optimization, and Tailwind CSS v4.
- Designed secure authentication flows (JWT, bcrypt) and presigned AWS S3 file uploads.
- Work in Dockerized local environments (PostgreSQL, Redis) and support deployment pipelines with Sentry monitoring.

01/2025 - 06/2025
Mumbai, India

Software Engineer Intern
Syntax Erreur
syntaxerreur.com

- Trained across the full stack on live production codebases (TypeScript, React, Node.js, PostgreSQL, Prisma, Flutter).
- Contributed to feature development while learning the team's architecture patterns, coding standards, and CI/CD workflow.

PROJECT EXPERIENCE

Livespace AI
livespace.ai

AI-powered platform for interior designers to showcase portfolios and visualize designs in users' own homes. Built across mobile app, web portal, and admin dashboard.

Stack: ReactJS · TypeScript · Tailwind · Express.js · Redux · PostgreSQL · Prisma · Firebase · Flutter · BLoc

ViewingNZ - Real Estate Marketplace

Property marketplace for New Zealand (browse, buy, sell, rent, schedule viewings). Led backend: REST API design, geolocation-based search, advanced filtering, AWS S3 media handling, JWT auth.

Stack: TypeScript · Express.js · PostgreSQL · Prisma · AWS S3 · Firebase · Multer · JWT
